

What is Therapeutic Recreation?

Therapeutic Recreation Professionals work with individuals of all ages who are experiencing disability, illness, or other limitations, teaching the skills, knowledge and behaviours to live the best life possible.

Therapeutic Recreation is a process that utilizes treatment, education and recreation participation to enable persons with physical, cognitive, emotional and/or social limitations to acquire and/or maintain the skills, knowledge and behaviours that will allow them to enjoy their leisure optimally & function independently with the least amount of assistance and participate as fully as possible in society. Therapeutic Recreation intervention is provided by trained professionals in clinical and /or community settings (TRO, 2003)
